ABSTRACT

This booklet provides graphs, tables, and a summary compiled from data collected in schools using the 1994-1995 PRIDE Questionnaire. The data reflect prevalence and patterns of drug and alcohol abuse, violence, gang activity, and suicide. This report is designed for educators to use within their drug abuse and violence awareness and prevention programs with faculty, students, and parents. This report provides a news release about results of the Pride Survey, an Outline of Procedures Used to Obtain PRIDE National Survey Data, information about PRIDE, and graphs that explain the relationship between student behavior and alcohol/drug use. The location and time of drug use graphs help with understanding the need for a commitment to drug abuse prevention by parents and the larger community. They show that student alcohol and other drug use occurs most often outside the school and at times when school is not in session. The availability graphs show that easy access to drugs increases the probability of use and that availability increases at higher grade levels. One hundred and fifteen percentage tables are included. Each table corresponds to an item on the questionnaire. Data is presented by grade level. (MKA)

INTRODUCTION TO SUMMARY AND GRAPHS

The following summary, graphs, and tables are compiled from data collected in your school(s) using the PRIDE Questionnaire. These data reflect prevalence and patterns of drug and alcohol use, violence, gang activity, and suicide. It is important that this report be utilized as part of your drug abuse and violence awareness and prevention program. We strongly suggest that you

COPY THE FOLLOWING PAGES---------->
(which highlight and graphically summarize drug use and violent behavior by students in your school),

DISTRIBUTE THEM TO YOUR FACULTY,

AND SHARE THIS INFORMATION WITH PARENTS.

Most of all, we strongly encourage a parent meeting at your school to share this information!

NOTE: Drug use occurs more often in the home than at school. Most drug use occurs on weekends when school is not in session. You will find statistics in this report which support these findings.

FOR GREATEST SUCCESS IN DECREASING DRUG USE, FACULTY, STUDENTS, AND PARENTS

MUST WORK TOGETHER TOWARD A DRUG-FREE LIFESTYLE.

TEEN DRUG USE RISES FOR FOURTH STRAIGHT YEAR

Parents can help, but too few talk to their children about drugs

WASHINGTON, Nov. 2 — One of America's largest parent organizations issued an urgent warning today to baby boomers with children: More of your teen-agers are using drugs than last year, and too few of you are doing what you can to prevent it.

In its annual survey of drug use by junior and senior high school students, PRIDE (National Parents' Resource Institute for Drug Education) reported significant increases in cigarette and marijuana use by students in grades 6 through 12 during the 1994-95 school year. Students in grades 9 through 12 also reported jumps in cocaine and hallucinogen use.

Today's announcement marks the fourth straight year PRIDE has alerted the nation about rising adolescent drug use, following a decade of declining youth involvement in alcohol, tobacco and other drugs.

Despite these alarming trends, PRIDE said too many parents are sitting on the sidelines as teen drug use worsens:

- Only one-third (34%) of the nearly 200,000 students surveyed said their parents talk to them frequently about the dangers of drug use (down from 39% in 1991-92).
- A third (33%) said their parents often do not set clear rules.
- And half (50%) said they are not disciplined routinely when they break the rules.

More

FAX 770-458-5030

Yet the study showed that parental involvement could significantly deter drug use, even among older teen-agers. Drug use declined sharply among students whose parents frequently discuss drugs with them. Among high schoolers whose parents "never" talk about drugs, 34% smoked marijuana, versus 24% who said their parents speak about drugs "a lot" — a drop of 29%.

"The most effective drug prevention program in the world — parental intervention — is used far less than we think," said Thomas J. Gleaton, president of PRIDE.

For every type of drug, and for every age, drug use was higher among students who reported little or no parental discussion. In most cases, the preventive effect seemed to be "dose related." The more often parents spoke with their children, the less frequently their children used drugs.

Even students reporting their parents "seldom" spoke to them used less drugs than those who said their parents "never" spoke to them. Of the "seldom" group, 30% used marijuana in the past year, versus 34% for the "never" group.

"The bottom line here is that it is better to say something than nothing at all," Gleaton said.

He urged parents to tell their children that drug use in any form will not be tolerated. Expected disciplinary action should be clearly stated beforehand and should be applied if a violation occurs.

As students get older, parents are far less likely to admonish them about the problems of drug use. In the sixth grade, for instance, 46% of students said their parents discuss drugs "often" or "a lot." That number fell by half, to 23%, among twelfth graders.

However, studies show that while a few children first use drugs in elementary and middle school years, most drug use begins during high school years. In the PRIDE Survey, 89% of twelfth graders who smoked marijuana in the past year said they initiated the drug use during high school years at ages 14-17.

"Parents do need to speak to children about drugs when they are very young. But a constant dialogue should continue throughout adolescence, and that isn't happening," Gleaton said.

More

The study found different responses to the question about parental communication between students of different racial groups. White students were less likely to report that their parents talk with them frequently about drugs. In grades 6 through 12, 13% of white students said their parents talk to them "a lot," versus 33% of black students.

White students were also less likely than blacks to say their parents set clear rules for them (39% vs. 51%). But discipline seemed to be meted out equally between the two races.

In general, white students reported higher incidence of drug use than black students. For all ten types of drugs studied, the percentage of white students in high school using drugs was higher. In junior high school, drug use by whites was higher in seven of the ten categories, lower only for beer, wine coolers and marijuana.

Among other major findings:

- On the basis of both annual and monthly use, increases were found in all grade levels for cigarettes and marijuana. Annual use of cigarettes in junior and senior high was the highest ever recorded by PRIDE.

- In high school (grades 9 through 12), on both annual and monthly basis, cocaine and hallucinogen use increased.

- Beer drinking by high school students reached a five-year high, and in junior high a two-year high.

- The only decreases detected were monthly use of liquor and inhalants by twelfth graders, and drinking wine coolers — products that are no longer being aggressively marketed.

- On a positive note, the study showed fewer students may be participating in violence-related behaviors like carrying guns to schools, making threats at school, and joining gangs.

One in three high school seniors smoke marijuana

As in recent years, marijuana use increased more dramatically than any drug in the study. One third of high school seniors (33%) smoked marijuana in the past year, and one fifth (21%) smoked monthly.

More

Since the 1990-91 school year, annual reported use of marijuana in junior high school (grades 6 through 8) has risen 111% (from 4.5% to 9.5%) and has risen 67% in high school (16.9% vs. 28.2%).

Young blacks are most affected by the surge in marijuana popularity. In grades 6 through 8, use by black males rose by 195% in the past four years (4.5% to 13.3%); use by black females rose by 253% (1.9% to 6.7%). Still, overall use of marijuana by black students in high school remained lower than white students, and was only slightly higher among junior high students.

"Hard drugs" show increases

The so-called "hard drugs" — cocaine and hallucinogens — reached their highest levels of use among high school students since the 1988-89 school year. There has been a 36% increase (from 3.3% to 4.5%) in cocaine use by students in grades 9 through 12 since 1991-92, the period of lowest use in recent years. Hallucinogen use has risen 75% since 1988-89, the recent low point (from 4.4% to 7.7%).

Cigarette use at eight-year high

In the eight years of the PRIDE national survey, cigarette use reached its highest levels during the 1994-95 school year. Nearly half (44%) of high school students smoked at least once in the past year, compared with 37% in 1988-89. In grades 6 through 12, nearly a third (28%) of students smoked.

Progress noted in school violence

The PRIDE survey indicates that national concern and action against school violence may have been effective. Fewer students reported carrying a gun to school, joining a gang, making a threat at school, or being hurt while at school.

In high school:

- 6.1% carried a gun to school, down from 7.4% in 1993-94
- 13.2% they took part in a gang, down from 13.8%

More

- 33.7% threatened to harm another student or teacher at school, down from 35%

- 13.9% got hurt at school, down from 14.5%

Drug use was more prevalent among students who carried a gun to school, joined a gang, got in trouble with the police, or experienced other negative behaviors.

For example, high school students who carried a gun to school were 12.5 times more likely to use cocaine (32.6% vs. 2.6%); those who joined gangs were 8.7 times more likely to use cocaine (19.2% vs. 2.2%); and those who got in trouble with the police were 8.9 times more likely to use cocaine (12.5% vs. 1.4%).

Methodology

The study was conducted during the 1994-95 school year, and involved 198,241 students in 32 states from California to New York. The PRIDE Survey represents data from sixth through twelfth grad students conducted between September and June of the school year. Participating schools are sent the PRIDE Questionnaire with explicit instructions for administering the anonymous, self-report instrument.

Schools that administer the PRIDE Questionnaire do so voluntarily, or in compliance with a school district or state request.

The Chi-Square Test of Independence was used to test the null hypothesis that the observed differences in the number of students who used a certain drug in 1993-94 and the number who used the same drug in 1994-95 was due to sampling variation. The null hypothesis was reputed at the alpha level of 0.05.

PRIDE's national survey of student drug use rates is consistent with other national studies, including the National Institute on Drug Abuse's Monitoring the Future Survey. Information from the PRIDE Survey is found in the President's National Drug Control Strategy and the Bureau of Justice Statistics Sourcebook.

This is the first national indication of drug use by students during the school year which ended in June 1995.

More

The PRIDE Survey results were released at the Community Anti-Drug Coalitions (CADCA) Leadership Forum at the J.W. Marriott Hotel in Washington. Joining Gleaton in the announcement were Dr. Lee P. Brown, director of the Office of National Drug Control Policy, and James Copple, national director of CADCA.

####

Notes:

- Junior high school, or junior high, means grades 6 through 8.
- Senior high school, or high school, means grades 9 through 12.
- Unless otherwise noted, incidence of use is stated in annual terms (at least once in the past year).
- Any decrease or increase noted is statistically significant at the .05 level of confidence.

Outline of Procedures Used to Obtain PRIDE National Summary Data

Since 1982, PRIDE, Inc. has assisted schools, school systems, communities, and states with conducting high quality surveys of student drug and alcohol use. The PRIDE Questionnaire for Grades 6-12 has been utilized by thousands of school systems across the United States, as well as in six other countries. Developmental studies (Adams, 1994; Craig and Emshoff, 1987) have indicated that the survey procedures developed by PRIDE result in reliable data on the prevalence and patterns of drug and alcohol use. Further, the evolution of PRIDE Questionnaires since 1980 not only provides research quality data, they provide information that can be easily used by educators, parents and others at the local school and community level to study and monitor the drug and alcohol behavior among their students.

From the beginning, PRIDE's intentions were to assist local schools and communities with obtaining accurate, defensible information about the drug and alcohol use among their youth. PRIDE has also worked with several state education and government agencies in providing state-wide and regional information on student drug and alcohol use. These state-wide surveys have included near-census studies as well as surveys employing sophisticated sampling designs. Survey results have been used in program and policy decision making at state and regional levels. In addition, true to PRIDE's original objective, each state-wide survey also included reports to participating schools for use at the local school level.

Each year PRIDE archives data from each student questionnaire. This procedure allows local or state educational agencies to retrieve their data should such a service be needed. This archiving process also provides for summary data to be compiled on adolescent drug and alcohol use on a national level. This national level summary data can be used by local and state clients as comparison data.

The PRIDE national archived data provide a rich source of information for the study of adolescent prevalence and patterns of drug and alcohol use. In the years prior to the 1989-90, sample sizes of national annual summaries ranged from 14,815 in 1982-83 to 392,003 in 1988-89. The annual summaries for the past six years (1989-90 through 1994-95) involved a weighting system for states that conducted state-wide surveys and states where relatively large numbers of school systems used the PRIDE Questionnaire in local surveys. This weighting system was implemented to prevent any one state from having a disproportionate influence on annual summary results. Random samples were drawn from those states where disproportionately large numbers of students were surveyed. Tables 1 - 3 contain information regarding national samples for the years 1989-90 through 1994-95.

Table 1 contains the total number of students surveyed in Grades 6-12 for the six year period. The large number of total students surveyed in years 1990-91 through 1992-93 reflects state-wide surveys conducted in these years. It should be noted that the size of actual samples used to compute national summary statistics were relatively consistent over the six years. Table 2 provides percentage information by state that comprised the PRIDE national summaries for each of the six years. No state contributed more than 10.1% for any year. Table 3 provides a year by year comparison by sex and race. These demographic comparisons indicate no inordinate differences among years.

TABLE 1
Sample Sizes of Annual Summaries for
1989-90 through 1994-95 for Grades 6 through 12

Year	*# Students Surveyed(6-12th)*	*[1]Sample(6-12th)*
1989-90	480,125	220,790
1990-91	738,577	247,337
1991-92	522,328	212.802
1992-93	790,628	236,745
1993-94	277,372	197,735
1994-95	231,433	198,241

[1]Sample (number drawn from the total number of students who completed the 6-12th Grade Questionnaire).

About *PRIDE*

PRIDE, the National Parents' Resource Institute for Drug Education, is a non-profit organization devoted to alcohol, tobacco, and other drug prevention. Based in Atlanta, it offers programs for parents, youth, educators, businesses, and governments.

The PRIDE World Drug Conference is the world's largest drug conference. The 1995 conference was held March 23-25 in Indianapolis. The 1996 conference will be March 28-30 in Cincinnati. There is a state conference in Arkansas.

Some 5,500 school systems rely upon PRIDE Questionnaires to monitor student drug abuse. The Questionnaires have been administered statewide in Georgia, Florida, Louisiana, New Hampshire, Ohio, West Virginia, and the District of Columbia. More than seven million youth have participated. Information from the survey is included in the Sourcebook of Criminal Justice Statistics and the National Drug Control Strategy.

PRIDE offers youth training programs known as America's PRIDE, ClubPRIDE and PRIDE Junior. Youth work with each other to solve problems and learn life skills. There are 400 high school and middle school PRIDE teams in the U.S.

PRIDE's Parent Training program has been implemented in 1,100 neighborhoods across the U.S. Users include parent groups, schools, treatment hospitals, public housing, and employers. It is available in English and Spanish.

PRIDE has developed workplace and cause marketing programs for Texas Instruments, EDS, The Coca-Cola Company, Kimberly Clark, Worthington Co., Motorola, and Toyota Motor Sales (which won a Silver Anvil Award from the Public Relations Society of America).

The PRIDE Volunteer Network contains more than 100,000 leaders of the anti-drug movement. PRIDE was selected by the Georgia Department of Human Resources to operate an regional prevention cooperative serving metro Atlanta and northwest Georgia.

PRIDE's youth action model is being implemented by the World Health Organization in the Caribbean. In January 1993, PRIDE co-sponsored a drug conference in Tokyo at the request of the Japanese Government. In June 1994, the Government of Senegal helped establish a PRIDE headquarters in Dakar. In July 1995, PRIDE directors were invited to deliver plenary addresses before the International Congress for the Prevention and Treatment of Drug Dependence in Buenos Aires. The conference was sponsored by Argentine President Carlos Saul Menem. The PRIDE Family of Nations includes 27 countries.

Thomas J. Gleaton, Jr., Ed.D.

Thomas J. Gleaton, Jr., Ed.D., is president and co-founder of the National Parent's Resource Institute for Drug Education, Inc. (PRIDE) and also serves as president of the International PRIDE Family of Nations.

The first Drug Conference on Youth and Drugs, initiated by Gleaton in 1973, has evolved into the PRIDE World Drug Conference. With an annual attendance of 10,000, it is the world's largest drug prevention conference.

Dr. Gleaton has served as an international speaker for PRIDE and the U.S. Information Agency in more than 30 countries. In 1987, he was appointed by President Reagan to the White House Conference for a Drug Free America. The same year he was appointed by the President to serve as a U.S. delegate to the United Nations International Conference on Drug Abuse and Illicit Trafficking in Vienna, Austria.

He has been an invited guest on Voice of America broadcasts, and served as advisor to network documentaries on NBC, ABC, the McNeil-Lehrer Report and the Westinghouse Broadcast Series. In addition, he has advised on six major national TV documentaries by Gannett/Dystar Productions entitled: "DOWNFALL: Sports and Drugs"; "Epidemic I: Why Is Your Kid On Drugs?"; "Epidemic II: America Fights Back"; DWI: Deadliest Weapon In America"; "America Hurts," and "Drugs In Black and White".

Gleaton received a doctorate in Education from the University of Southern Mississippi, and earned B.S. and M.A. degrees from the University of Alabama.

Gleaton has been published in journals including the National PTA, U.S. Journal, Psychiatry Letter, American Journal of Psychiatry, Pharmacy Times, and Medical Times. He has supplied information for various articles in Ladies Home Journal, McCall's, Family Circle, Good Housekeeping, The Washington Post, and The New York Times. He has also contributed to PRIDE publications and productions.

###

DRUG USE

Number of students at the junior high level (6-8th) surveyed: 92453
Number of students at the senior high level (9-12th) surveyed: 105788
Total number of students surveyed: 198241

Cigarette Use

a) **28.1** percent of 1994-95 National Summary students at the junior high level (6-8th) said they smoked cigarettes within the past year (1993-94 PRIDE Natl. Avg. 6-8th = 26.3%).

b) **44.4** percent of students at the senior high level (9-12th) said they smoked cigarettes within the past year (1993-94 PRIDE Natl. Avg. 9-12th = 41.5%).

Alcohol Use

a) **30.8** percent of junior high students reported drinking beer within the past year (1993-94 Nat. Avg. 6-8th = 30.3%). **12.1** percent of those who drank said they most often became "very high" or "bombed" when they drank.

b) **57.4** percent of senior high students reported drinking beer within the past year (1993-94 Nat. Avg. 9-12th = 56.5%). **26.7** percent of those who drank said they most often became "very high" or "bombed."

Marijuana Use

a) **28.2** percent of senior high students used marijuana within the past year (1993-94 Nat. Avg. 9-12th = 24.6%). Of those who used, **72.5** percent said they most often got "very high" or "bombed" when they used marijuana.

b) **22.2** percent of senior high students used marijuana on weekends and **4.2** percent used marijuana during school.

Cocaine Use

4.5 percent of senior high students reported using cocaine within the past year (1993-94 Nat. Avg. 9-12th = 4.0%). Of those who used, **75.2** percent said they most often got "very high" or "bombed" when they used.

Hallucinogen (LSD) Use

7.7 percent of senior high students reported using hallucinogens within the past year (1993-94 Nat. Avg. 9-12th = 6.6%). Of those who used, **86.3** percent said they most often got "very high" or "bombed."

GUNS

Total number of students surveyed = 198241

9687 students report carrying a gun to school.
(4.9% of total responding)

Of the 9687 students who report carrying a gun to school,

* 7254 report using liquor (77.7%)@.
* 6208 report using marijuana (66.2%).
* 3288 report using hallucinogens (35.3%).
* 2939 report using cocaine (31.5%).

Drug Use Of Students Who Carry Guns VS Students Who Do Not Carry Guns
(number of students surveyed = 198241)

	GUNS	NO GUNS
	(9687 students)	(187347 students)
Liquor	77.7%	35.4%
Marijuana	66.2%	17.1%
Hallucinogens	35.3%	3.7%
Cocaine	31.5%	1.8%

Figures represent annual drug use.

@ This percentage is calculated as follows: The number of those reporting to carry a gun to school and claiming to use liquor DIVIDED BY the number of those reporting to carry a gun to school and validly responding to the question, "How Often Do You Use Liquor?"

GANGS

Total number of students surveyed = 198241

26934 students report taking part in gang activities.
(13.8% of total responding)

Of the 26934 students who report taking part in gang activities,

* 17182 report using liquor (65.3%)@.
* 13028 report using marijuana (49.4%).
* 4744 report using hallucinogens (18.0%).
* 3886 report using cocaine (14.7%).

Drug Use Of Students In Gangs VS Students Not In Gangs
(number of students surveyed = 198241)

	GANGS	NO GANGS
	(26934 students)	(168659 students)
Liquor	65.3%	33.0%
Marijuana	49.4%	14.7%
Hallucinogens	18.0%	3.2%
Cocaine	14.7%	1.4%

Figures represent annual drug use.

@ This percentage is calculated as follows: The number of those reporting to take part in gang activities and claiming to use liquor DIVIDED BY the number of those reporting to take part in gang activities and validly responding to the question, "How Often Do You Use Liquor?"

SUICIDE

Total number of students surveyed = 198241

13850 students report thinking often or a lot about committing suicide.
(7.1% of total responding)

Of the 13850 students who report thinking often/a lot about suicide,

* 8774 report using liquor (64.7%)@.
* 6213 report using marijuana (45.7%).
* 2850 report using hallucinogens (21.0%).
* 2218 report using cocaine (16.3%).

Drug Use Of Students Who Think Of Suicide Often/A Lot VS Who Do Not
(number of students surveyed = 198241)

	SUICIDE	NO SUICIDE
	(13850 students)	(181236 students)
Liquor	64.7%	35.4%
Marijuana	45.7%	17.5%
Hallucinogens	21.0%	4.0%
Cocaine	16.3%	2.2%

Figures represent annual drug use.

@ This percentage is calculated as follows: The number of those reporting to think of suicide "Often" or "A Lot" and claiming to use liquor DIVIDED BY the number of those reporting to think of suicide "Often" or "A Lot" and validly responding to the question, "How Often Do You Use Liquor?"

THREATENING BEHAVIOR

Total number of students surveyed = 198241

62467 students report threatening to harm another student or teacher.
(31.8% of total responding)

Of the 62467 students who report threatening to harm,

* 7779 report carrying a gun to school (12.5%).
* 35457 report using liquor (57.8%)@.
* 22496 report using marijuana (36.6%).
* 7176 report using hallucinogens (11.7%).
* 4914 report using cocaine (8.0%).

Drug Use Of Students Who Threaten VS Students Who Do Not Threaten
(number of students surveyed = 198241)

	THREATEN	NOT THREATEN
	(62467 students)	(133824 students)
Liquor	57.8%	28.0%
Marijuana	36.6%	11.5%
Hallucinogens	11.7%	2.2%
Cocaine	8.0%	1.0%

Figures represent annual drug use.

@ This percentage is calculated as follows: The number of those threatening to harm another and using liquor DIVIDED BY the number of those threatening to harm another and validly responding to the question, "How Often Do You Use Liquor?"

TROUBLE WITH THE POLICE

Total number of students surveyed = 198241

48390 students report getting in trouble with the police.
(24.7% of total responding)

Of the 48390 students who report getting in trouble with the police,

* 30205 report using liquor (63.7%)@.
* 21832 report using marijuana (45.9%).
* 7345 report using hallucinogens (15.5%).
* 4926 report using cocaine (10.4%).

Drug Use Of Students Who Get In Trouble With Police VS Who Do Not
(number of students surveyed = 198241)

	TROUBLE	NO TROUBLE
	(48390 students)	(147343 students)
Liquor	63.7%	28.8%
Marijuana	45.9%	10.8%
Hallucinogens	15.5%	1.9%
Cocaine	10.4%	0.9%

Figures represent annual drug use.

@ This percentage is calculated as follows: The number of those getting in trouble with the police and using liquor DIVIDED BY the number of those getting in trouble with the police and validly responding to the question, "How Often Do You Use Liquor?"

PERSONAL SAFETY

Total number of students surveyed = 198241

70031 students report being afraid another student will hurt them at school.
(35.6% of total responding)

Of these 70031 students,
3244 report carrying a gun to school (4.6%).

34622 students report getting hurt by another student at school.
(17.6% of total responding)

Of these 34622 students,
3008 report carrying a gun to school (8.7%).

RISK AND PROTECTIVE FACTORS

Total number of students surveyed: 198241

A "**risk factor**" is any characteristic which researchers have linked to a higher incidence of drug use. A "**protective factor**" is any characteristic which has been linked to a lower incidence of drug use. The following analysis of local risk and protective factors does not consider any cause and effect, only a **relationship** between student characteristics and drug use. Community, School, Family, and Individual/Peer risk and protective factors are grouped accordingly and discussed.

COMMUNITY

Table 1:

***RISK FACTORS* - COMMUNITY**
(number of students surveyed = 198241)

FACTOR:	*% AT RISK*
JOIN IN COMMUNITY ACTIV'S "Never/Seldom"	**53.7%**
ATTEND CHURCH OR SYNAGOGUE "Never/Seldom"	**32.1%**
TAKE PART IN GANGS ("Seldom/Some/Often/Lot")	**13.8%**
SUBSTANCE AVAILABILITY ("Fairly/Very Easy" To Get) ---	
Beer	**55.1%**
Wine Coolers	**52.0%**
Liquor	**47.2%**
Marijuana	**35.3%**
Cocaine	**15.8%**
Uppers	**18.0%**
Downers	**16.3%**
Inhalants	**26.2%**
Hallucinogens	**15.9%**

The above survey results show community risk factors. These factors include **low neighborhood attachment** ("never" or "seldom" participate in community activities, church, or synagogue); **community disorganization and norms favorable toward drug use** (student participation in gangs); and **availability of alcohol and other drugs** ("fairly" or "very easy" to get alcohol and other drugs). Note that a higher risk factor indicates an increased probability of involvement in drug use.

Table 2:

***PROTECTIVE FACTORS* - COMMUNITY**
(number of students surveyed = 198241)

FACTOR:	*% PROTECTED*
JOIN IN COMMUNITY ACITV'S "Often/A Lot"	26.9%
ATTEND CHURCH OR SYNAGOGUE "Often/A Lot"	48.3%
TAKE PART IN GANGS "Never"	86.2%
SUBSTANCE AVAILABILITY ("Cannot Get/ Don't Know") ---	
Beer	39.1%
Wine Coolers	42.0%
Liquor	46.3%
Marijuana	60.9%
Cocaine	79.5%
Uppers	78.3%
Downers	80.1%
Inhalants	71.6%
Hallucinogens	79.9%

The above survey results show community protective factors. These factors include **supportive networks and social bonds** (participate in community activities, church, or synagogue "often" or "a lot"); **community organization and norms to support non-use among youth** (participation in gangs "never"); and **limited availability of alcohol and other drugs** ("cannot get" or "don't know" how to get alcohol and other drugs). Note that a higher protective factor indicates a decreased probability of involvement in drug use.

SCHOOL

Table 3:

***RISK FACTORS* - SCHOOL**
(number of students surveyed = 198241)

FACTOR:	*% AT RISK*
MAKE GOOD GRADES "Never/Seldom"	5.2%
JOIN IN SCHOOL ACTIVITIES "Never/Seldom"	29.4%
TROUBLE AT SCHOOL "Often/A lot"	7.7%

The above survey results show school risk factors. These factors include **academic failure** ("never" or "seldom" make good grades); **low commitment to school** ("never" or "seldom" join in school activities); and **early anti-social behavior** (get into trouble at school "often" or "a lot").

Table 4:

***PROTECTIVE FACTORS* - SCHOOL**
(number of students surveyed = 198241)

FACTOR:	*% PROTECTED*
MAKE GOOD GRADES "Often/A lot"	63.6%
JOIN IN SCHOOL ACTIVITIES "Often/A lot"	51.7%
TROUBLE AT SCHOOL "Never/Seldom"	73.0%

The above survey results show school protective factors. These factors include **high academic expectations, goal setting and mastery** (make good grades "often" or "a lot"); **active involvement in extra-curricular activities sponsored by the school** (join in school activities "often" or "a lot"); and **pro-social development** ("never" or "seldom" get into trouble at school).

FAMILY

Table 5:

***RISK FACTORS* - FAMILY**
(number of students surveyed = 198241)

FACTOR:	*% AT RISK*
PARENTS TALK ABOUT DRUGS "Never/Seldom"	**36.4%**
PARENTS SET CLEAR RULES "Never/Seldom"	**13.7%**
PARENTS ENFORCE RULES "Never/Seldom"	**23.1%**

The above survey results show family risk factors. These factors include **weak parental attitudes towards use** (parents "never" or "seldom" talk to their children about the harmful effects of using drugs) and **family management problems** (parents "never" or "seldom" set clear rules and "never" or "seldom" enforce those rules).

Table 6:

***PROTECTIVE FACTORS* - FAMILY**
(number of students surveyed = 198241)

FACTOR:	*% PROTECTED*
PARENTS TALK ABOUT DRUGS "Often/A lot"	**33.7%**
PARENTS SET CLEAR RULES "Often/A lot"	**67.4%**
PARENTS ENFORCE RULES "Often/A lot"	**49.4%**

The above survey results show family protective factors. These factors include **strong parental attitudes against adolescent drug use** (parents talk to their children about the harmful effects of using drugs "often" or "a lot"); **parents' clear expectations of their children** (parents set clear rules "often" or "a lot"); and **discipline** (parents punish their children "often" or "a lot" when they break the rules).

INDIVIDUAL/PEER

Table 7:

***RISK FACTORS* - INDIVIDUAL/PEER**
(number of students surveyed = 198241)

FACTOR:	*% AT RISK*
THREATEN STUDENTS/TEACHERS ("Seld/Som/Oft/Lot")	**31.8%**
TROUBLE WITH POLICE ("Seldom/Some/Often/Lot")	**24.7%**
THINK ABOUT SUICIDE ("Often/A Lot")	**7.1%**

Table 7 shows individual/peer risk factors. These include **anti-social behavior in early adolescence and rebelliousness** (threaten to harm others and get in trouble with the police) and **alienation** (think about suicide "often" or "a lot").

Table 8:

***PROTECTIVE FACTORS* - INDIVIDUAL/PEER**
(number of students surveyed = 198241)

FACTOR:	*% PROTECTED*
THREATEN STUDENTS/TEACHERS "Never"	**68.2%**
TROUBLE WITH POLICE "Never"	**75.3%**
THINK ABOUT SUICIDE "Never/Seldom"	**84.0%**

Table 8 shows individual/peer protective factors. These factors include **respect for authority** ("never" threaten to harm students or teachers and "never" get into trouble with the police); **feeling of belonging, higher respect for self** (think about suicide "never" or "seldom").

INTRODUCTION TO GRAPHS (Pages 1 - 10)

The graphs on pages 1-10 will assist you in understanding the relationship of students to alcohol and other drugs. You are encouraged to make overheads or slides from the graphs for presentations to school faculty, parents, media, and other audiences in the community.

The "Location" (pp. 2-4) and "Time" (pp. 5-7) of drug use graphs will be helpful in understanding the need for a commitment to drug abuse prevention by parents and the larger community - not just by schools. Student alcohol and other drug use occurs most often outside the school and at times when school is not in session.

Research indicates that easy access, "Availability" (pp. 8-10), to drugs increases the probability of use. Availability of alcohol and other drugs normally increases at higher grade levels.

WHAT CAN YOU DO AS A PARENT, TEACHER, OR CONCERNED CITIZEN?

The drug merchandizers thrive on the ignorance, apathy, and irresponsibility of ordinary citizens.

YOU CAN MAKE A DIFFERENCE!

Here's how:

1) Educate yourself and your family about the health hazards of drugs.

2) Insist on no illegal drug use by youngsters. This includes alcohol, tobacco, and marijuana.

3) Support drug education in the schools, workplace, churches, and civic associations.

4) Rebuild understanding and respect for the laws concerning alcohol, marijuana, cocaine, and other drugs.

5) Recognize the danger of the illegal consumer as well as the illegal supplier of alcohol and other drugs.

6) Support law-enforcement efforts at home and abroad.

7) Write letters to, telephone, and visit those members of the publishing, merchandising, and media world who glamorize, trivialize, or subsidize the drug culture.

INTRODUCTION TO PERCENTAGE TABLES

This report contains your school survey results in tabular form. Each table corresponds to an item on the questionnaire. The tables contain percentage data by grade level, "Junior High" (grades 6 through 8), "Senior High" (grades 9 through 12), and "Total." The "N of Valid" column contains the number of students responding to the item and the "N of Missing" column contains the number of students not responding to the item. The remaining columns contain the percentages of students responding to the particular response categories.

The percentage tables of the report appear in the same order as corresponding questions on the questionnaire. The Table of Contents contains the percentage tables by section and gives the page number where each is located.

The last section of tables (prefixed by the number "12") presents the frequency of drug use (section 4) data with the categories "collapsed" as follows:

Daily Use	=	Every Day
Weekly Use	=	Once/Week + 3 Times/Week + Every Day
Monthly Use	=	Once/Month + Twice/Month + Once/Week + 3 Times/Week + Every Day
Annual Use	=	Once/Year + 6 Times/Year + Once/Month + Twice/Month + Once/Week + 3 Times/Week + Every Day

If you have questions about this report or if you wish to have information on other PRIDE services and products, please call the PRIDE Office at (404) 577-4500 or write to the following address:
